

WHAT DO I DO WHEN MY CHILD NEEDS TO USE ANTIBIOTICS?

By Stephanie Ray, President of BIORAY®

BIORAY Kids® LIQUID HERBAL DROPS

Are you looking for ways to support your child's health when surrounded by so many immune triggers at school? In Traditional Chinese medicine we say the gastrointestinal tract is our first line of defense against these triggers. Keeping the gut supported with a balance of beneficial microflora, the good "bugs", is so important for this reason. Here are some easy tips to enhance your child's super immune building abilities every day. Additionally, we've included easy and effective methods to support your little guy or gal's body when western medicines like antibiotics are necessary.

EVERYDAY NATURAL DEFENSE ENHANCERS

NDF BELLY BALANCE® is a superior defense enhancer where kids need it most...in their tummy! **NDF BELLY BALANCE®**, a probiotic lysate, strengthens the integrity of the gut lining, creates an environment where beneficial gut flora can colonize and thrive, and supports healthy immune function. Your child's gut-brain connection will be at its peak.

Several of the ingredients in NDF BELLY BALANCE® are 'immunity foods' with the following benefits:

- Produce antibodies that assist your child's body in combating invasive bugs*
- Support healthy digestion while replenishing essential nutrients, vitamins and antioxidants*
- Impede the growth of bad bugs, alleviate constipation, and modulate the immune system*
- Bind toxins in the gastrointestinal tract and support growth of beneficial microflora*

FACT: Meat that is not chewed well (almost to a liquid) goes directly to the blood, turns into ammonia and rises to the brain. It is very difficult for our kids to think with high ammonia.

FACT: Gluten in grains like wheat is an irritant to the gastrointestinal tract, regardless if you have tested sensitive to it or not. It also causes the blood cells to stick together making it hard for oxygen to circulate. Tiredness will follow. If you need to give your child gluten, balance their meal with two green foods like steamed broccoli and asparagus. Option: Mash veggies, add sea salt, a bit of lemon juice and spread on bread. Adding other healthy ingredients is always beneficial.

"NDF BELLY BALANCE® and NDF CALM® help my belly, and when they go down, it makes my belly feel good."

— Gabriel, 5 years old

During Antibiotic Use:

Traditional western medicine like antibiotics are there when we need them - and that's good! But they also have a negative impact on the natural flora in the body.

Antibiotics destroy the friendly and beneficial microbiology in the gastrointestinal tract. This leaves our kids susceptible to bad bugs or invaders. The byproducts of these bad bugs are sent to the liver to be removed from the body. Since these byproducts are toxic, they put stress on the liver as well as the kidneys by making them work harder.

HERE'S HOW TO SUPPORT HEALTHY LIVER AND KIDNEY FUNCTION IN YOUR CHILD:

NDF CALM® helps the liver filter toxic byproducts by supplying it with "liver food". Medicinal mushrooms are well known for their ability to rejuvenate healthy liver cells. Many ingredients in **NDF CALM®** benefit the liver and are totally non-toxic even in high quantities.

Here are a few of the awesome ingredients in NDF CALM®:

- Agaricus Blazei Mycelia is the richest source of beta glucans, a food for the liver*
- Reishi mushroom helps the immune system, enhances oxygen utilization, and supports healthy liver function*

*These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent any disease.

- Maitake mushroom is an adaptogenic, immunity tonic for kids which protects the liver*
- Coriolus Mycelia is a potent immune builder which benefits the liver and cellular energy*
- Chlorella binds to and removes toxins while improving healthy liver function.*

NDF CALM® Recommended Intake:

- Under 50 lbs: 1 dropper per day mixed in water or juice
- Over 51 lbs: 2 droppers per day mixed in water or juice

After Antibiotic Use:

The integrity of the gastrointestinal tract must be in harmony or bad bugs will grow and take over. Here’s what to do to continue to bring your child’s terrain into balance.

STEP 1: CONTINUE TO SUPPORT HEALTHY LIVER FUNCTION WITH NDF CALM®:

NDF CALM® helps residue left behind from medication move down and out of the body. Your child will be feeling less irritable and sleep well.

“My son is on NDF BELLY BALANCE® and NDF CALM® and his speech has come in leaps and bounds. He goes to the bathroom without any pain, almost daily. This used to be a painful once a month occurrence. He has calmed down and is sleeping better.”
 — Sara, mom

STEP 2: BALANCE AND NOURISH THE GUT WITH NDF BELLY BALANCE®:

Continue with NDF BELLY BALANCE® to push bad bugs out of the gastrointestinal tract, support immunity, and restore gastrointestinal integrity. Both NDF CALM® and NDF BELLY BALANCE® bind to toxic by-products assisting in their removal.

NDF BELLY BALANCE® Recommended intake:

- Under 50 lbs: 1 dropper per day of each NDF CALM® and NDF BELLY BALANCE® in water or juice
- Over 51 lbs: 2 droppers per day of each NDF CALM® and NDF BELLY BALANCE® in water or juice

STEP 3: RE-ESTABLISH BENEFICIAL FLORA IN THE GASTROINTESTINAL TRACT AND COLON WITH YOUR PROBIOTICS OF CHOICE.

Now that we’ve done the heavy lifting with NDF BELLY BALANCE® - decreasing the “bad bugs” in the GI tract and colon, we’re ready to “implant” with colonizing probiotics. These live probiotics re-establish your child’s gut flora.

Probiotic Recommended intake:

Manufacturer’s recommended dose, 3x a day. Open capsules and mix in water or juice.

Continue NDF CALM®, NDF BELLY BALANCE® and live probiotics for 1-3 months depending on the length of your child’s antibiotic protocol and the severity of his/her symptoms.

At BIORAY Kids® we believe your child can have the best of both worlds - eastern and western. Both worlds have value. Our mission is to educate you so you get the most value for you and your family.
